## NHP and HEP Nylon Nozzle Holder

This high quality brand belongs to the product group “pressure blast systems”. Only the perfect configuration and match of all system components in a blast machine enable maximum blasting efficiency. Therefore Clemco offers an extensive and complete range of quality products.

NHP and HEP Nylon Nozzle Holder  
Nozzle holder made of light but robust nylon, produced out of best raw materials. The combination of puristic design and long lifetime made our nozzle holders the standard in the abrasive market.

Blasting pressure	0 < > 12 bar
Operating temperature	-15°C < > +50°C

## TECHNICADATA SHEET

*Note: For safe, efficient blasting, read and follow the owner's manual and seek training for everyone who will use this equipment.*

### Purpose

The Clemco fiber-reinforced nylon nozzle holder attaches to the end of a blast hose and holds a contractor-thread blast

### Description of Operation

*NHP shown with optional nozzle and hose*

The blast hose must be cut squarely and cleanly. The nozzle holder is installed with the screws provided. These screws penetrate the outer wall, but not the inner wall of the blast hose.

In operation, the air pressure inside the blast hose helps hold the nozzle holder securely in place.

A nozzle washer must be placed on the nozzle must be shoulder inside the nozzle holder to prevent premature wear and failure, of both the holder and the nozzle, from high-speed abrasive.

## Description

Fiber-reinforced nylon nozzle holder for abrasive blasting — with Contractor threads.
